Overview

Next-Generation DNA
Sequencing Workshop

Todos Santos Center
November 18-20, 2019

What the workshop is...

- an introduction to DNA sequencing library construction, experimental design, and technologies
- based on a course developed and taught at Colorado State University by Mark Stenglein, Carol Wilusz, and Dan Sloan
- a first time experiment (so be patient with us 😊)

What the workshop is NOT...

- an introduction to computational biology and bioinformatics (see our computational workshop in April)
